Zurn 62: Lyman-Morse Nears Completion of 62' Flybridge

Marblehead, MA – Renowned yacht builder Lyman-Morse is putting the final touches on one of the latest designs from the ever-expanding portfolio of Massachusetts-based Zurn Yacht Design. This 62' flybridge motoryacht, dubbed *Mad Max* by her very knowledgeable owners, places a premium on both performance and comfortable on board living. Lyman-Morse anticipates a spring launch date for this beautiful custom cruiser.

With a high length-to-beam ratio (approaching 4.0), carefully designed running bottom and efficient propulsion system, Zurn Yacht Design's Doug Zurn has ensured a smooth, comfortable ride. Lightweight composites and materials keep this big motoryacht relatively light and nimble, giving her the agility of a boat half her size and a top speed better than 32 knots. Cruising comfortably at 21 knots with standard twin CAT C-18 1,000hp diesels, the Zurn 62 affords a very respectable 950 nautical mile cruising range.

A bi-level aft cockpit and large swim platform provide plenty of room for relaxing and enjoying life at the water's edge. The lower cockpit

doubles as a storage bay for a 10-1/2 ft. waterjet-powered RIB. Up on high, the flybridge offers commanding views, a helm station with full compliment of navigation electronics, a refrigerator for drinks and comfortable lounging for six.

The interior layout centers around two large common areas: a spacious pilothouse saloon and a lower level 'great room', featuring galley, bar, lounge and entertainment center. The full width master stateroom resides aft, comfortably situated around the hull's center of gravity. This spacious suite offers a true king size bed, office workstation and ensuite head with stall shower. Hull ports draw in abundant natural light and ventilation. Forward, the guest stateroom offers a queen size island berth, abundant clothing and gear storage, plus private access to a head and shower.

Principal Dimensions:

LOA: 65' - 5"

Disp: 81,600 lbs.

Beam: 18' - 6"

Fuel: 1,950 gals.

Draft: 4' - 0"

Water: 425 gals.

With the renowned craftsmen and women of Lyman-Morse at the helm, the Zurn 62 is sure to be a stunning work of art when completed. Her handsome lines will be nicely complimented by the exquisite joinery details that this famed Maine yard has become so well known for.

Those interested in learning more about this project should contact either Lyman-Morse or Zurn Yacht Design for further details.
